

It all began in 1983 when the legendary “Pastorelli” (Umberto) started his business as a distributor with two bags full of Rhythmic Gymnastics equipment. His great passion, combined with the help of his family, led in a short time to the company's growth and to its evolution:

From a purely trade company Pastorelli started producing its own equipment with the benefit of controlling product lines offered to its customers. The dedication to work and the pursuit of improving the quality of the items have marked the essence of the Company and has been our true inspiring philosophy.

After 27 years of activity, the Company is supplier to the National Team of Rhythmic Gymnastics and its equipment (Pastorelli hoops and clubs) has partially contributed to the success of the wonderful Italian team “champions” who reached the gold medal at the World Championships in Baku in 2005.

From Baku to today, many successes of the Italian Team and also teams from abroad (at the 2008 Beijing Olympics, 11 teams out of 12 finalists) were winning with PASTORELLI apparatus.

At the World Championships in Moscow 2010, we received over 15 approval certificates from the International Gymnastics Federation, the highest international gymnastics organization, and thus becoming a FIG Official Partner.

Today 's company has more than 2,500 items entirely designed and developed within the company. We occupy more than 2,000 square meters for the production of the gymnastic items and as our storage facility. Finally a rare production of one of a kind glitter balls, and elegant leotards for Rhythmic and Artistic Gymnastics represent the highest form of creativity of our employees.
